Node.js

PROJECTS

Mood Tracker App

Developing an interactive Mood Tracker app that visualizes emotional trends and recommends personalized content (blogs, music, videos) based on mood patterns using interactive UI and JavaScript.

Key Features:

- Mood input interface.
- Data visualization (graph/chart).
- Personalized content suggestions.
- Optional mood-based journaling.

Password Generator Web App

Built a customizable password generator using JavaScript, allowing users to select password length and character types. Strengthened DOM manipulation and logic-building skills.

Key Features:

- Toggle options for character types.
- Adjustable password length.
- Copy-to-clipboard functionality.
- Real-time UI updates.

INTERESTS

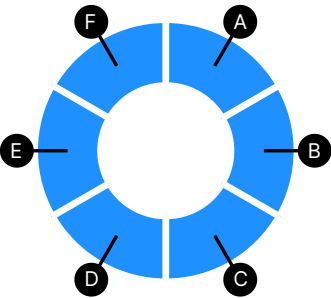

Frontend Web Development

Passionate about frontend development, UI/UX design, and building creative, user-focused web apps. Interested in problem-solving, JavaScript logic, and using tech for mental wellness and productivity.
